Art Unit: 2154

DETAILED ACTION

1. In claim 43, an ending period is missing. Correction is required.

Art Rejections:

2. Claims 34, 36-38, 40-42, 44, 47-49 and 51-52 are rejected under 35 U.S.C. § 102(e) as being clearly anticipated by Narendran et al, U.S. pat. No. 6,070,191.

<u>Narendran</u> discloses a system and method for resolving network domain name comprising:

- a) one or more client computers and connected to a network,
- b) a plurality of servers and/or group/pool of servers connected to the network (<u>see col 3, lines 57-66</u>),
- c) at least one or more servers operates as a DNS server for resolving domain name request from the clients, each DNS server comprises computer instructions for:
- i) receiving a communication request from one of the client computers (col 4, lines 5-10),
- ii) extracting a host name from the request and determining whether the host name is a site name for a particular server or a group/pool name for a group/pool of servers (col 4, lines 10-14),

· Application/Control Number: 09/687,779

Art Unit: 2154

iii) redirecting/mapping the communication request to a pool/group of servers corresponding to the server that serves the request (see col 4, lines 14-15).

Per claims 36-37, 41, 47-48 and 52, <u>Narendran</u> also teaches performing load balancing to select appropriate servers to serve the client request (see col 4, lines 41 -67).

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 35, 39, 43 and 50 are rejected under 35 U.S.C. 103(a) as being unpatentable over <u>Narendran</u>, and further in view of <u>Swildens</u> et al, U.S. pat. No. 6,484,143.

Narendran's teachings are still applied as discussed in item 2 above. Narendran does not explicitly teach providing failover DNS. The use of multiple DNS servers including failover DNS server for enhancing reliability and availability of network services is well known in the art as disclosed in Swildens col 4, lines 45-47).

· Application/Control Number: 09/687,779

Art Unit: 2154

It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize a failover DNS server in Narendran because it would have enhanced reliability and availability of network services.

<u>Swildens</u> also teaches using flags or error codes to indicate operation errors of DNS server (<u>see Swildens' col 18</u>, lines 10-14).

5. Claims 45-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over <u>Narendran</u>, and further in view of <u>Risley</u> et al, U.S. pat. No. 6,332,158.

<u>Narendran</u>'s teachings are still applied as discussed in item 2 above. <u>Narendran</u> does not explicitly teach directing client request to proper server when the request contains improper server name. <u>Risley</u> discloses a DNS server capable of correcting or suggesting and directing client request to proper server when the request contains improper server name (<u>see</u> Risley's col 5, lines 3-26).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify <u>Narendran</u> with <u>Risley</u>'s teachings because it would have assisted client to select a proper a server site.

· Application/Control Number: 09/687,779

Art Unit: 2154

Allowable Subject Matter:

6. Claims 11-15, 26-30 and 32-33 are allowed over prior art of record.

Response to Amendment:

7. Applicant's arguments filed on 4/5/04 with respect to claims 34-52 are moot in view of new ground of rejection set forth above. The examiner submits that the new claims still fail to define the invention over prior art of record as discussed above.

Conclusion:

8. Applicant's amendment necessitated the new grounds of rejection. Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P. § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BECALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
